

How To Measure For Your PCA Screen Door

DIRECTIONS

1. Measure opening WIDTH between moldings in two places.
2. Measure opening HEIGHT from bottom of overhead brick molding to top of threshold in two places.
3. Measure existing door KNOB HEIGHT from threshold.
4. Determine HINGE SIDE. Standing outside looking in, if the hinge is on the left it is a left hinge, if it is on the right it is a right hinge.

I want my screen door hinge on the:

Left Side
 Hinge Side
 Right Side
